EDUCATION

RUTGERS UNIVERSITY - Honors College May 2027
B.S in Computer Science & Economics, Minor in Asian Studies **GPA**: 4.00/4.00

Honors & Awards: HC Dean's Scholarship, Dean's List, SAS Excellence Scholar, KPMG Case Competition–Finalist

PROFESSIONAL EXPERIENCE

Citigroup Inc. | NYC, NY
Technology Summer Analyst Jun. 2026 – Aug. 2026

- Analyzed historical incident logs and system error patterns across Equities Derivatives trading desks to conduct root-cause analysis on recurring technical bottlenecks impacting high-frequency trading operations
- Built a centralized Portfolio Risk Management dashboard using React, HTML, and a backend integration layer with Citi's Stylus AI Tool, connecting ServiceNow, JIRA, and Confluence to streamline incident triage
- Reduced mean time to resolution by 15% and added executive-level analytics modules giving engineering leadership visibility into weekly and monthly incident trends and system health metrics

Rutgers University | New Brunswick, NJ
Undergraduate Teaching Assistant (CS111/CS112) Sep. 2025 – Present

- Provide comprehensive support for 1,500+ students by managing online forum inquiries and coordinating between professors, TAs, and students to clarify course material and address common pain points
- Lead weekly in-person recitations for 40+ students to reinforce core CS lecture topics, guide practice problem-solving, and foster a collaborative learning environment

Bergen's Promise | Hackensack, NJ
Data Analyst Intern Jun. 2025 – Aug. 2025

- Analyzed service utilization trends across 10,000+ youth participant records using SQL joins and aggregations and Excel pivot tables, informing outreach strategies that increased effectiveness by 20%
- Researched drivers behind a 60% early program closure rate to inform retention initiatives targeting a 25% reduction in client turnover
- Presented data-driven recommendations via Power BI dashboards to 10+ cross-functional managers to guide resource allocation

ELEMIS | Remote
Business Analyst Intern May 2024 – Aug. 2024

- Built an Excel comparison matrix of 3-5 competitor products for each of the top 10 ELEMIS products, comparing claims, ingredients, storytelling, and consumer reviews to identify US positioning gaps
- Analyzed US skincare market size, growth, and segmentation (age, income, concern, price tier) using Mintel, IBISWorld, and Statista data to define ELEMIS's target segments and competitive set
- Synthesized findings into recommendations (add medical-expert credibility, build "skin ritual" messaging, segment the target market more finely) and presented them as a team deliverable

PROJECTS

AI Chatbot | *Next.js, React, JavaScript*

- Built a responsive chat interface in Next.js that streams AI responses token by token, with a model selector and a New chat action
- Formatted responses with react-markdown and integrated Puter.js so the app runs without an API key or backend
- Designed the chatbot as a template for organizations to automate repetitive support work, such as answering common HR, IT help desk, and product questions, freeing staff to focus on complex requests

RUMAPS | *Java, Swing GUI*

- Built an interactive "mini Google Maps" for Rutgers New Brunswick in Java, modeling campus as a weighted graph (intersections as vertices, street blocks as edges with length and traffic factor) with a custom Swing interface featuring live hover detection and path highlighting
- Implemented BFS and Dijkstra's algorithm to compute and render the minimum-intersection route and the fastest traffic-weighted route in real time, using a seeded randomizer to simulate per-block traffic

SKILLS & INTERESTS

Languages & Frameworks: Java, Javascript, Python, SQL, C, C++, Next.js, HTML, React, MATLAB
Tools & Platforms: Azure, Databricks, Docker, Kubernetes, GitHub, Power BI, Excel, Copilot, Claude
Interests: Badminton, Swimming, Weightlifting, Chess, Card games
